OpenGlobal RSEvents Pro Links For JCE Advanced Link

Instruction Manual

Introduction

This JCE plugin allows links to RSEvents Pro categories and events to be easily created by adding an RS Events Pro tree structure to the JCE Advanced Link popup.

Installation

The OpenGlobal RSEvents Pro Links For JCE Advanced Link plugin installs using the JCE installer, NOT the Joommla standard installer. Simply log into the Joomla! administrative control panel as an Administrator and go to Components > JCE Editor > Install Add-ons.

Upload and install the package by locating the package on your computer and clicking "Install Package".

As long as there are no errors, the plugin is now installed.

Usage

Whenever you use the JCE Advanced Link pop up in JCE, you will now see an extra option for RSEvents Pro. Simply open up the tree to drill down through categories and events. Click on the category or event that you want to link to and the URL field will be populated for you.
