OpenGlobal RSEvents Pro Plugin for Xmap

Instruction Manual

Introduction

This Xmap plugin allows your sitemap to list all of the RSEvents category and event spages.

Installation

The OpenGlobal RSEvents Pro Plugin for Xmap installs in exactly the same way as any other Joomla! plugin. Simply log into the Joomla! administrative control panel as an Administrator (not "Manager") and go to Extensions > Install/Uninstall.

Upload and install the package by locating the package on your computer and clicking "Upload File & Install".

As long as there are no errors, the plugin is now installed. You will need to go into the Plugin Manager and publish the plugin. You can also configure the priority and change frequency for the categories and events just like the other Xmap plugins.
